

GRADUS

SR 410 TRACKED SCREEN

The SR410 tracked screen

The SR410 tracked screen is the latest in a range of compact screens designed to offer customers an entry level screen that can produce good tonnages at the right price!

The SR410 has been primarily designed for the iron-ore, sand & gravel and aggregate markets and can be loaded directly with a shovel/excavator or from the belt of a crusher. Like all Gradus' products, the SR410 will containerise without any breakdown thus reducing shipping costs around the globe to an absolute minimum. Applications include iron-ore, sand/gravel, aggregates, bauxite, coal, compost and topsoil.
